Project Portfolio Page

Lau Wei Tang

National University of Singapore

1. About me

I am a second year undergraduate student, pursuing a bachelor's degree in Computer Science from National University of Singapore. During the course of my education, I worked on a Software Engineering Project. We were required to implement several key features to enhance on the basic command line interface application. My team and I decided to morph the project into a file management system that manages all our files. However, given the limitation of the project, we decided to work on supporting PDF files, and the application is called see PDF++

Additional stuff to include in this portion

```
Portfolio purpose: document my role and contributions

Project name and description - what were my tasks, what I did do to meet task
requirements

Background info about the project scope

A legend to the icons and formatting used in the document
```

2. Summary of contributions

Robust File Protection System

Encrypt

Decrypt

Test Cases for Commands and Command Parsers

The challenges faced and how I contributed in reviewing the code and suggested fixes to bugs found in code

Technical Leadership

Show examples of code for team to reuse

```
Enhancements

code contributed

other contributions
```

3. Contributions to the User Guide

Insert description as well as abstract from the User Guide

> Include some enhancement made using abstract from the Developer Guide
>
> Proposed enhancement for v2.0

4. Contributions to the Developer Guide

Insert description as well as abstract from the Developer Guide

```
Include some enhancement made using abstract from the Developer Guide

Proposed enhancement for v2.0
```

```
Main things to include:

1. Links to collated code

2. features I purpose to implement in the future (from DG and UG if possible)

3. Other significant contributions
```
